

ABSTRACT

SPECTRUM RECEIVER AND RELATED METHOD

- 5 A method and apparatus (1A) for receiving a spread spectrum signal at
a mobile communications terminal, including the step of processing the signal
for the purposes of signal acquisition and signal tracking, monitoring
movement of the mobile terminal and deriving a signal indicative of a
characteristic of movement of the mobile terminal, and further including
10 changing the mode of the processing of the incoming spectrum signal in
response to the signal indicating the said characteristic of movement of the
mobile terminal.
